

This DVD ' The First Ring ' project is a project of ' Fan for Fan ' on the work of Tolkien.

It was built with the aim of the sharing, of the discovery, to show that about is the passion which drives us, which collects us, the work is not congealed, but do not well and truly current. That through an imaginary world, we speak about us all a foot in the life and one foot in its life...

I wished by means of all these artists to pay tribute to this man...

It is important to understand that this project has no lucrative purpose. The sale of this box will serve to pay off some expenses of its conception.

That is why I pressed it only to 400 copies, to avoid any suspicion of personal enrichment.
